AtomiSoft

0. Introduction

It all started back in 1995. We were giving end-user trainings for a customer, and then someone asked us to develop an application in MS Access. We did the job, and liked MS Access that much that we choose it as our primary development tool.

Since then, our main business is the development of MS Access applications. If required we use MS SQL Server as the back-end of the application. If an interface with a dll is required, or if there are intensive calculations, we use PowerBasic.

We prefer fixed price projects, but it is also possible to have an MS Access programmer for the duration of a project in your company.

We are working both in Belgium and Luxemburg.
Our prices are reasonable, our quality is excellent. We have satisfied clients.
Other services of AtomiSoft are:
- ▲ **Training MS Access Programming**
- ▲ Training MS Access End user
- ▲ MS Access manuals
- ▲ **Rental of fully equipped ICT Trainingrooms/meetingrooms**
- ▲ RISK, www.AtomiRisk.be, an 'off-the-shelf'application to manage the 'Globaal preventieplan'
- ▲ Pesten op het werk, www.AtomiRisk.be, an 'off-the-shelf' application to perform the analysis 'Pesten, ongewenst seksueel gedrag en geweld op het werk'
- ▲ BatiExcel
  A management program for small and medium sized companies in the Belgian construction sector.

1. Fixed price projects

We see ourselves as **MS Access professionals**, we aren't expensive consultants.
We prefer to work on fixed price projects. Together with the customer we make a price offer for his project. This document describes the functionality of the program with drawings and text, it contains the delivery date and the price of the project. When the customer accepts our proposal, the project is developed either in our office in Brussels or on the premises of the customer. All price offers are free.

We are proud of the projects we have realized for our customers!

For more information call 02/478.48.88

2. MS Access contractors

It is also possible to have an experienced MS Access programmer in your company for the duration of a project. We accept jobs in Belgium and in Luxemburg.

Our developers are experienced with projects in:

- **MS Access**
- **MS Access/MS SQL Server**
- **MS Access + PowerBasic**

3. MS Access Training

You want to learn to work with MS Access yourself? Learn it from the MS Access professionals!
We have both end-user and programming trainings.

▲ MS Access End user trainings

There are two levels: 'Beginners' and 'Advanced'. Both trainings can be organized in Dutch, French and English.

▲ MS Access Programming

There are two levels available.

-For software developers

For developers experienced with another development tool, eg. VB or C, and with a basic knowledge of MS Access

-For Power Users

For users with a good working experience of MS Access, but without programming experience.

You will find more information about our courses on our website. For price information call 02/478.48.88.

4. Trainingroom rental

Do you need a fully equipped ICT trainingroom for a trainingsession or a productdemonstration?
Our trainingroom, plus coffeeroom, can be rented on a daily basis. Its interior is suited ideally for a training or a productdemonstration.
Our prices are competive, call 02/478.48.88, or email to info@atomisoft.be
The following is always included in the price:

▲8 or 10 PC's for the participants
▲1 PC for the trainer/moderator
▲**Sandwichlunch** for all the participants
▲**Coffee and softdrinks**
▲VGA multiplier for the trainer
▲Plenty of free parking space in the neighbourhood
▲ADSL internet access in the coffeeroom

5. Meetingroom rental

Are you looking for an affordable meetingroom for your management or language trainings? Do want to have a business meeting with a customer in a stylish environment?

Our meetingroom, can be rented on a daily basis.
Our prices are competive, call 02/478.48.88, or email to info@atomisoft.be
The following is always included in the price:

- ▲ Rental of the meetingroom
- ▲ LCD projector (2000 Ansi Lumen) + PC
- ▲ Flipchart
- ▲ **Sandwichlunch** for all the participants
- ▲ **Coffee and softdrinks**
- ▲ ADSL-internet access
- ▲ Plenty of free parking space in the neighbourhood

6. Software for the HR manager and the Prevention officer

6.1 RISK

An application to manage the security risks of companies and to compose its **'globaal preventieplan'**.
It also allows the user to compose 'werkpostfiches' for temporary staff.
The application is very easy to use. It has two examples, 'garage' and 'office' which makes it easy to compose your own 'globaal preventieplan'.
It costs 499 Euro/licence excl. VAT. For more information, consult www.AtomiRisk.be.

6.2 STOP Pesten op het werk

An application to perform the analysis 'Pesten, ongewenst seksueel gedrag en geweld op het werk'.
It costs 649 Euro excl. VAT. For more information, consult www.AtomiRisk.be.

7. Software for the construction sector: BatiExcel

A management program for small and medium sized companies in the Belgian construction sector. It allows them to create priceoffers, to manage their clients and prospects, to create invoices, to create orderforms, etc... It contains the knowledge base 'BatiNorm'. For more information: www.BatiExcel.be

8. Trainingmanuals

We have trainingmanuals for MS Windows, MS Word, MS PowerPoint, MS Excel and MS Access. All manuals are in English and available in two levels. They are the same manuals we use for our MicroSoft End User Training.
You can buy them for yourself, for your own trainingsessions, for an in-company trainingproject, ...
Volumediscounts are available from 10 copies.
For price information, call 02/478.48.88, or email to info@atomisoft.be
If you are located outside Belgium, we will ship the order to you with DHL
