

MS Access developers

It is also possible to have an experienced MS Access contractor of AtomiSoft in your company. This is possible for the duration of a project, or for a limited period of time.

Our developers are experienced in

- ▲ MS Access
- ▲ MS Access + MS SQL Server
- ▲ MS Access + PowerBasic

We are proud of the projects we have realized for our customers!

Fixed price projects

We prefer to work on 'fixed price' projects. We make a price offer for the project, and develop the project in our office or in the customers office. Of course, all price offers are free.

Step 1

We discuss the project with the customer. We will ask questions and will take notes.

Step 2

We will make a price offer within 10 business days and send it to the customer. This document describes the functionality of the program with drawings and text, it contains the delivery date and the price of the project.

Step 3

If the customer has remarks, we will modify the price offer accordingly.

Step 4

Upon receipt of a signed orderform from the customer, we will develop the project in our or in his offices. The application will be installed in the office of the customer at the delivery date. Also we will give a short training.

MS Access training

You want to learn to program in MS Access yourself? Learn programming with AtomiSoft, the MS Access professionals.

MS Access programming

▲ **For software developers**
For developers experienced with another development tool, eg. VB or C, and with a basic knowledge of MS Access

▲ **For Power Users**
For users with a good working experience of MS Access, but without programming experience.

MS Access end user training

There are two levels: Beginners and Advanced.

You will find more information about our training programs on our website.

Trainingroom rental

We also rent fully equipped ICT trainingrooms in Brussels, that you can use for your own training sessions. If you want more information, give us a call and we will send you a brochure by mail.
